AQARI
## The Real Estate Analysis App

Cider YOUR CTO SERVICES

GOAL

Our goal was to build a Real Estate Investment & Acquisition Application that allows users to analyze potential real estate investments. The application allows users to calculate various financial and real estate metrics, catered to their situation in just a few minutes. It allows the user to customize the analysis to their specific acquisition and the app will generate DCF Cashflows and Financial Results (IRR, ROI, Debt Coverage, Etc) in a clear and easy to understand way.

TECHNOLOGIES

| Android SDK | iOS SDK |
| Google API | Firebase |
| JS |
